SUBRAMANIAN S

MSc Data Science & Analytics, University of Leeds | SQL, Power BI & Python | 3+ YOE | Data Analyst
Ex-Accenture | NHS | United Kingdom | +44 7823793965 | subru.ms57@gmail.com | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Level 7 Data Analyst with 3+ years' experience at **Accenture** and the **NHS**, delivering 20+ analytical reports from large datasets to support data-driven decisions. Improved data accuracy by 20%+ through validation and integrity checks,

enabling reliable KPI reporting and business insights. **Microsoft Certified Power BI Analyst** skilled in Python and SQL, building dashboards used by 15+ stakeholders.

RELEVANT SKILLS

- **Functional Competencies:** Data Analysis | KPI & Performance Reporting | Stakeholder Engagement | Requirements Gathering | Data Visualisation | Dashboard Development | Statistical Analysis | Data Quality & Integrity Management | Data Governance & Compliance | Insight Communication | Cross-Functional Collaboration | Decision Support
- **Technical Tools:** Power BI | DAX | SQL | Python | R | SPSS | Microsoft Excel | Data Modelling | Dashboard & Reporting Tools.

EDUCATION

MSc Data Science & Analytics – University of Leeds | 2024-2025

- Graduated with Merit, studying machine learning, data science, business analytics, and statistical modelling for data-driven decision making.
- Applied Python, R, SQL, and analytical techniques to analyse datasets, build predictive models, and generate business insights.

BTech Information Technology – Chennai University | 2018-2022

- Completed coursework in data structures, database management systems (DBMS), Java programming, Internet of Things (IoT), statistics, and calculus.
- Developed strong foundations in algorithms, statistical analysis, and data management.

WORK EXPERIENCE

Happy City Hub - Research Analyst | 2026

- Analysed and structured research datasets using Excel and internal systems, producing 12+ KPI reports and insight summaries to support research initiatives.
- Identified and resolved data quality issues through validation and cleansing, improving dataset accuracy by 18% and strengthening data integrity.
- Transformed complex datasets into structured spreadsheets and visual summaries, enabling 5+ stakeholders to interpret insights and support decisions.
- Implemented structured data checks and documentation processes, reducing data inconsistencies by 15% and improving reporting reliability.

National Health Service - Data Analyst | 2025

- Analysed NHS prescribing datasets using Python (Pandas) to examine prescription trends across 7 NHS regions and 30+ antidepressant medications.
- Cleaned and structured large healthcare datasets through data filtering, validation, and transformation, improving dataset usability for regional analysis.
- Performed data aggregation and exploratory analysis to identify prescribing patterns and cost distribution across healthcare dat in asets.
- Developed reproducible data analysis workflows in Jupyter Notebook, enabling structured data processing and transparent analytical outputs.

Accenture - Data Analyst | 2022-2024

- Analysed large customer and operational datasets using Excel, CRM systems, and internal databases, generating 20+ performance reports to support business intelligence and operational decision-making.
- Investigated and resolved data quality and integrity issues using structured data validation processes, improving reporting accuracy by 22% across operational datasets.
- Developed structured datasets and reporting outputs using database querying and CRM data analysis, enabling 15+ stakeholders to access actionable insights on customer and operational metrics.
- Maintained secure customer data records following data governance and privacy standards, ensuring 100% compliance with internal data security policies.

PROJECTS

Data-Driven Aviation Performance Dashboard | Power BI, DAX, Excel | Live Dashboard

- Developed an interactive Power BI dashboard analysing 738,000+ UK flight records to monitor operational KPIs including delays, punctuality, and airport performance.
- Designed data models and DAX measures to build dynamic visualisations and drill-down reports, improving stakeholder access to performance insights.
- Interpreted aviation datasets using analytical techniques and trend analysis, identifying key delay hotspots and seasonal patterns.
- Demonstrates ability to design dashboards, analyse complex datasets, and deliver actionable insights supporting data-driven decisions.

Statistical Analysis of Dog Rehoming Data | R, Statistical Modelling | Github

- Analysed animal rehoming datasets containing 10,000+ records to investigate adoption duration patterns across breeds and demographic factors.
- Applied statistical modelling, hypothesis testing, and distribution fitting using R, generating evidence-based insights into adoption trends.
- Conducted exploratory data analysis and visualisation, identifying variables influencing rehoming timelines and adoption outcomes.
- Highlights expertise in statistical techniques, research methodologies, and translating complex analytical findings into meaningful insights.

CERTIFICATIONS

- **Microsoft Certified: Azure AI Fundamentals (AI-900)**, Demonstrates foundational knowledge of artificial intelligence concepts, machine learning principles, and responsible AI using Microsoft Azure.
- **Microsoft Certified: Power BI Data Analyst Associate**, Validates expertise in data modelling, DAX, data transformation, and building interactive Power BI dashboards for business insights.
- **Microsoft Office Specialist: Excel Associate**, Demonstrates proficiency in advanced Excel functions, data analysis, and spreadsheet-based reporting.
- **McKinsey & Company: Forward Program**, Professional development programme focusing on structured problem-solving, analytical thinking, and business decision making.

KEY AWARDS & RECOGNITION

- **Accenture Tech Expressway Program,** Successfully completed structured technical training and assessment in enterprise technologies, demonstrating strong analytical and problem-solving capabilities in a corporate data environment.
- **Research Presentation – National Conference,** Presented research titled *"A Novel Approach for Image Security: Reversible Watermarking"*, showcasing analytical research methodology and technical problem-solving.
